We are the owners of our own lives. We are positive. Unstoppable. We're pure. Through and through. Inside out. Pure energy. Pure product. Pure he rts. WHO ARE WE? 4. 1,800.ARBONNE ARBONNE.COM 5. History Arbonne Stian Mørck, The Story of CEO Arbonne Arbonne begins with my father, Petter Mørck, who founded this company more than 30 years ago. His passion for beauty and perfection only found in nature led him to develop plant-based products around our philosophy – pure, safe, ™. The name Arbonne comes from a village in Switzerland, which means beautiful tree. This is a metaphor for everything Arbonne - natural and permanent, offers shelter and abundance, is always green and always grows. Like my father, I am passionate about the dream that made Arbonne a unique company today. His vision is all about quality - products, people and their quality of life. Arbonne opens people's eyes to not only what they can do, but what they can be. One of my father's greatest pleasures Life is human, and anyone who knows him can tell you that he always treats independent counsel as family. The nature of his care quickly became, and continues to be, an important part of the vibrant Arbonne culture – allowing us to help transform lives, return, and leave the earth better than we find it for future generations. Wanting to grow stronger and get better, that's also part of our legacy. And that is just our past - it shines a light on our future. Arbonne is a place where ordinary people do extraordinary things every day to enhance not only their own lives, but also the lives of so many others. Petter Mørck, Founder 5 6. Life with Petter 1,800.ARBONNE ARBONNE.COM 7. The story of Petter Standing on a simple farm dressed modestly, the boy's eyes reflect a worldly curiosity and yearning for experience. The gray background is the perfect contrast to where life will take him. At the age of 14, he left home to regain his fortune. To make his mark. As a sailor on the crew of a merchant ship, he spent years sailing around the world, from New York to Australia and everywhere between. He returned to a man's house. A good traveler, self-study, graceful risk taker, willing to transform the world. Always looking for knowledge and refusing to be distracted by anything subs% he has the rare ability to recognize quality – in everything, in people, and in business. The world's best became his standard, and he stayed true to that philosophy when he began the greatest adventure of his life. From the moment of conception, Arbonne will bring only the highest quality ingredients and the most advanced products to the rest of the world. An idea has become a legacy. A moment has become an endless opportunity. 7 8. People and nature always have an inland connection. Plants and flowers give us energy, vitality and life in incredible ways. We are attracted to nature. It nourishes our souls and our sense of happiness. The dynamic link between man and nature is the nature of Arbonne. Our plant-based products make the best use of what nature has to offer to improve our lives. We look to nature for products that make us feel healthier, revived and more beautiful. From a field, a farm, or even the ocean, we gently harvest gifts of nature. We carefully source them from all over the world - Europe, Asia, the United States - always with sustainability in our hearts and minds. In the capable hands of our product development team, beneficial ingredients are given a new life as an integral piece of an Arbonne product formula. Guided by green chemical principles, our talented scientists – under the direction of Dr. Peter Matravers, Arbonne Scientific Director, and Jennifer Chang, R&C Director; D - put product concepts into practice at Arbonne Research and Development Laboratory. This state-of-the-art facility in Irvine, California, is where Arbonne scientists created product prototypes and tested formulas for stability and efficiency. That's where miraculously occurs. The end result is a world-class product crafted with integrity, expertise and innovation. Created especially for you. From the realm of nature to you. Enjoy and be healthy. From the field to you 1,800.ARBONNE ARBONNE.COM 9. As we celebrate Arbonne's amazing 35th anniversary, I continue to be incredibly proud of the unbelievable growth of our company and how our independent consultants have grown their business and theirs Community. For five years I had the honor of leading the Arbonne and, even in my most optimistic moments, I could not have imagined the motivation, success and life-changing achievements we would make together. We are very fortunate to be part of this vision founder Arbonne Petter Mørck created decades ago. We are growing and expanding to other countries – last October welcomed the Polish Arbonne to our communities of the United States, Canada, the United Kingdom, and Australia. We are also delighted to welcome so many new preferred customers to our community, adding hundreds of thousands of people to choose Arbonne products for themselves and their families. The founding principle - pure, safe, beneficial™ - has taken on new meanings and deeper dimensions as we explore new science, focus on green chemistry, and maintain our strict composition policy to provide the safest, most beneficial forments for families around the globe. From ingredients that benefit our modern lab and world-class Scientific Advisory Council, to our ever-evolving Green Commitment, and vegan, gluten-free and non-cruel standards – we know we have the best personal care and personal health care products , plant-based on the market. As important as the products are the great people who drive our business to new levels every year! Our independent advisory leaders continue to surprise me with their positive leadership, enthusiasm and passion for Arbonne, and the level of perseverance and dedication I have never seen in any business, anywhere. We have the most incredibly talented people in our Arbonne family, and they are a huge part of what makes this company so special. This is why we introduce our independent consultants and their incredible conversion stories throughout these category pages. Since the launch of the Arbonne charitable foundation in April 2012® in the United States, the charity has officially been established in Canada, Australia and the United Kingdom and is growing in numbers in all four countries. More than 40,000 teenagers have been affected globally through monetary and product funding programs. To date, the Foundation has raised \$2.5 million, thanks to the generosity of our independent consultants Arbonne, our employees and suppliers, and the significant support received from Arbonne. Arbonne donates administrative and operational expenses so that all donation funds are directly directed towards supporting fund programs and participants. The Foundation's goal for 2015 is to double the number of affected youth and raise \$3.5 million. Join us and become part of our family as a preferred customer or Independent consultant to see how reward rewarding it can be. You can transform yourself and others, which really makes Arbonne the chance of a lifetime. Arbonne Nora Zorich Scientific Advisory Board, M.D., Ph.D.* Chairman, NLZ Consulting, LLC Retired VP Research and Development, Procter & Gamble Laura Fortner, M.D., F.A.C.O.G. Maibach, Professor, Department of Dermatology; University of California, San Francisco Carleeta Nelson, MS, RN Arbonne Independent Consultant, National Executive Vice President, Oklahoma, U.S. CPN-BC Board certified in Pediatric Nursing from ANCC (American Nurses Credentialing Center) Janellen Smith, MS Professor of Dermatology; University of California, Irvine Christopher B. Zachary, President of MBBS FRCP, Department of Dermatology; University of California, Irvine * President, Arbonne Scientific Advisory Board. A message from CEO Kay Napier, CEO of Arbonne 9 10. Transparent and honest. For 35 years, this is a sign of our product integrity. From the very beginning, Arbonne developed products by combining nature's best with leading science. Our mission is to always improve and evaluate our component policy as a growing standard of excellence. This means we constantly challenge ourselves to do better and better. Arbonne Ingredient Policy Pure We are working diligently to understand the latest science - consult our Scientific Advisory Board and adapt to new standards. Each product contains carefully selected ingredients, based on plant studies. Safety We strictly inspect our products. We are cautious about the latest research regarding chemicals to ensure we are minded and vigilant. Our beneficial products provide results. As trailblazers, we must educate, empower and inspire people to make better choices for the beauty, health and health of their families and friends. Our list of no ingredients has evolved over time, based on industry knowledge, proven research, and smarter choices. We took a close look at the ingredients and set the guidelines more stringently before it became stylish. We build without animal products or complementary products | artificial flavors | Artificial sweetener | benzene | bisphenol-a | black carbon | preservation substances donated by formaldehyde | hydroquinone | mineral oil | parabens | petrolatum | pthalates | sodium laureth sulfate (SLES) | sodium lauryl sulfate (SLS) | synthetic dye | melt | triclosan | triethanolamine (TEA) See page 127 for more ingredients information.
