Download, liked the first bit so I bought the game. Very soon after it becomes counter intuitive. There is no hint, the map shows nothing but locked areas and no justification as to where the keys may be. After 10 minutes of wandering and looking at all the places I quit. No entertainment, .. Frustrating. I understand that it is difficult to balance the game for all users, greatly experienced casual beginner, but that's what the hints are all about. Those who play a lot can't use hints. By ok there's no nickname 4 curse werewolves It's too dark! I even have screen brightness and contrast turned up to max and I still don't see things in ho bits. Also - there is a walkthrough if you need it - Google it. Good game except I had to stop - It's hurting my eyes. With truly disappointed, totally 3 is not worth the money. The game advertises much more than it provides. It's too short and there is no alternative to a single scenario. I do not play many games and buy even less. Even at \$4.99, it's still not a good deal. I expected a lot more and was definitely disappointed. Curse of werewolves I'm really enjoying the game. Clever layout and artwork and storyline. I just wish if there was no reason to review the artifact, that access to that feature would be turned off.
